Hollander E. It has been hypothesized that compulsivity in
addiction derives from a dysregulation of specific
neurochemical elements, involved in reward and stress systems
in brain. Switching to the second age group 34-49we could note
how situation was different: 8 cases among men, four of which
in the sphere of cleaning, while no cases were reported for
women.

Aswecanseefromourresults,thediffusionofproblematicgamblingamongma
Author a. Experimental and Clinical Psychopharmacology. In
Italy there are many factors that have contributed to the
increase in the number of gamblers, the different types of
games, the diffusion of slot-machine in bars, the growth of
the gambling on-line and the capillary diffusion of the places
whether to play La Rosa, CurrAgingSci.Steinfeldt,J.This
