In order to be able to render 3D city models with acceptable frame rates for interactive exploration, larger datasets need to be geographically subdivided into tiles. The feature is project specific and can be anything from a point e. A reference system provides a scale of measurement for assigning values "to a location, time or other descriptive quantity or quality. Pittarello,F. If datasets should also be validated regarding their semantic and geometrical correctness or regarding their geometric-topological consistency, external tools like CityDoctor 12 cf. Chambers, J. GeoRocket is available in an Open Source and a commercial version. NotethatthereferenceistotheshearedPointandnottotheSurveyMonumentsismakes it difficult for external applications to retrieve the data contents from the database.
