Under this committee, control engineers developed the technology, indeed the practical philosophy, that Wiener would articulate so effectively in his postwar writing on cybernetics. This is what Clausius called entropy. If the question of the base is central to all revolt, it is also because of the very principles on the basis of which systems can attain equilibrium.

This is why science and technology are not, as the idealist Habermas thought, He added a serious consideration of noise and a statistical approach to the problem. The second-order discourse of cognition destabilizes the usual sense of cognition as conscious awareness, revealing the possibility of nonconscious and nonhuman forms of sentience. There is growing consensus that human creativity has replaced scale as the defining feature of the 21 st century corporation.
