Lazarus, a Free Pascal based free and open source cross-platform Delphi look-a-like software development tool, has been around for a while now and has become more and more mature. The resulting SQL code can now be opened with a simple text editor so you can copy it and paste it into your Lazarus Pascal code.

Program variables can be inspected by pointing at the variable name in the Source Database Administration. The left button will now toggle between two alternative messages. Awesome, great work!

Skip to the beginning of the images gallery. Morgan Quigley. This, as you can guess, worked fine in my setup. If this is not visible immediately, it can be made to appear by pressing the F12 key, which toggles between the Source Editor view and the Form view.
