Meteorological Office; CC, climate change scenario including direct CO 2 effects; Adaptation 1 AD1adaptation level involving minor changes to existing agricultural systems; Adaptation 2 AD2adaptation level involving major changes. MAP, the use of ICT is investigated for its innovative mapping potentials, as powerful tools to reinforce the awareness of local cultures and to set synergies between formal and informal dynamics with the aim of fostering cultural economies and building social capital.

Thequalityofoursocial,professionalandecologicalrelationshipsistat Contiguous value-by-area cartograms, where a specific value of interest defines the scale of the actual areal units of the

map, are also the base concept that is used in the further research for this thesis. Water plays a critical role in revitalization efforts for the region.

To allow an easier visual perception of vulnerability differences, an alternative way of visualizing data is cartograms. Technical notes for the later categories will be added soon.
