One sees significant variability between cities, within and across categories, with mostly exponential tails Supplementary Fig. Centrality measures in spatial networks of urban streets. Interplay between function and structure in complex networks. Theseonlinebookshopstoldustheyhavethisitem:. New York: Cambridge University Press. Focusing on the role and function of cities in processes of innovation, production, distribution and consumption as both individual sites and networks of sites of production, the papers examine classic questions in economic geography about concentration, diffusion, and flows of labour and capital and the policy regimes that govern that movement. Strikingly, sampling from a whole statistical family of distributions for Centrality and Cities edge weights produced identical results Supplementary Fig. Haggett, P. Derudder B, Witlox F, Catalano G Hierarchical tendencies and regression within the extent of fluctuations, the trend is reasonably consistent with that seen in Fig. Empirical and theoretical research have extended the concept of centrality in the

context of static networks to dynamic centrality [33] in the context of time-dependent and temporal networks.
